

ACHIN KULSHRESHTHA

Backend & DevOps Engineer | Team Lead

📞 7073497842 @ achinstark8@gmail.com 🌐 <https://achin-portfolio.vercel.app> 📍 Jaipur, Rajasthan, 302029

SUMMARY

I am a results-driven Full Stack Developer & DevOps Engineer with over 3 years of experience in building scalable backend systems and cloud infrastructure. Proficient in Python, Flask, MongoDB, and AWS, I have hands-on experience in DevOps automation, socket streaming, and system security. I excel at creating responsive web and mobile applications using React, Flutter, and TypeScript, ensuring seamless user experiences

EXPERIENCE

Backend & DevOps Engineer | Team Lead

Strategic Fulcrums Private Limited 10/2022 - 01/1970

Jaipur, Rajasthan

A private limited company focused on developing and scaling backend applications and cloud-based solutions

- Built and maintained scalable backend systems using Python and Flask, implementing RESTful APIs and efficient data workflows
- Leveraged MongoDB to handle large datasets (1M+ nodes in WhifCal), optimizing queries and structure for performance
- Developed real-time features using WebSockets and Socket Streaming for live updates and collaboration in both products
- Automated infrastructure and internal workflows using Shell and Python scripts, reducing manual operations and deployment effort
- Managed scalable cloud deployments using AWS services including EC2, S3, CloudWatch, and WAF for security and observability
- Created scheduled jobs with CRON for automated reporting, system health checks, and data cleanup
- PostMark for transactional email delivery
- Google Services (OAuth, Sheets, Drive API) for integrations
- FCM for push notifications
- Apple Store Connect and Google Play Billing for mobile in-app subscriptions and purchase validation
- PayU for secure payment gateway processing
- Used Bitbucket Pipelines to implement CI/CD for rapid, test-driven deployments
- Monitored and debugged live systems with AWS CloudWatch, setting up alarms, logs, and dashboards
- Applied WAF rules and rate-limiting strategies to secure APIs and block abusive traffic in production environments
- Collaborated across teams to ensure seamless backend performance, system reliability, and integration scalability for Clarity Do and Whifcal

EDUCATION

Bachelor In Computer Applications

Modi Institute Of Management & Technology, University Of Kota

06/2018 - 06/2021 Kota, Rajasthan

KEY ACHIEVEMENTS

💡 Project Delivery Excellence

Successfully delivered production-ready projects including Clarity Do, Whifcal.

SKILLS

Agile	AWS	AWS S3	AWS Services	
CloudWatch	Django	EC2	FCM	
Flask	Flutter	Gatsby	Git	
Google Firebase		Google Sheets		
GraphQL	MongoDB	Modular		
OAuth	Python	React	REST	S3
SEO	Sequelize	TypeScript	Vercel	
WebSockets	Shell Scripting		Node.js	
BitBucket	Gateway	Gmail		
Angular	Responsive Web			

EXPERIENCE

Full Stack Developer

Billu Personal Care Private Limited 01/2022 - 10/2022

Jaipur, Rajasthan

A personal care company that provides quality products supported by digital solutions

- Engineered web solutions using GatsbyJS and ReactJS, delivering fast and SEO-optimized frontends
- Developed backend services with NodeJS and TypeScript, implementing modular and scalable architecture
- Utilized GraphQL for efficient data querying and managed relational data with Sequelize and MySQL
- Automated deployment, backup, and routine tasks using Python and Shell scripts
- Integrated third-party tools like MSG91 for communication and PayU for payments
- Handled asset storage and delivery via AWS S3, optimizing content access and security

Full Stack Developer

Planet Web Solution 11/2020 - 12/2021 Jaipur, Rajasthan

A web solution provider that specializes in full-stack development and digital services

- Built and maintained scalable web applications using GatsbyJS, ReactJS, NodeJS, and TypeScript
- Designed and consumed APIs with GraphQL, using Sequelize ORM and MySQL for database operations
- Integrated services like MSG91 for messaging and PayU for secure payment processing
- Automated server and development tasks using Python and Shell scripts
- Managed file storage and static assets with AWS S3
- Delivered end-to-end features with optimized frontend performance and secure backend logic

Full Stack Developer(intern)

Centre for Development of Advanced Computing : C-DAC

01/2020 - 04/2020 Jaipur, Rajasthan

A premier institution for advanced computing and research initiatives

- Developed responsive and dynamic user interfaces using React, Gatsby, and Angular
- Utilized TypeScript for type-safe, scalable frontend architecture
- Built RESTful APIs and backend logic with Python and Django
- Integrated frontend with backend systems to deliver full-stack features
- Collaborated with cross-functional teams to implement UI components and backend services
- Followed best practices in code quality, version control (Git), and debugging
